

# What is Maryland's Wound Care Initiative?

The Health Facilities Association of Maryland (HFAM) and the Maryland Hospital Association (MHA) as part of our efforts to continuously improve quality care and the comfort and well-being of patients, have joined forces to reduce the rate of occurrence of pressure ulcers in acute and long-term care facilities. In collaboration with The Wound Care Education Institute, Inc. (WCEI) and with the support of a grant from the Office of Health Care Quality, HFAM and MHA will offer health professionals educational opportunities to

learn the latest techniques for the prevention and treatment of pressure ulcers and become certified in wound care. In the Spring of 2011 we will offer two opportunities to attend a four-day comprehensive training program and certification for the management of skin and wound care. Attendees of the November 30th session and their teams will be offered a special registration fee for the comprehensive sessions. More information will be available on November 30th.
