The breadth of training topics you need. The interactive and engaging design your staff wants.

The Relias learning management system (LMS) and course libraries have the high-quality content needed to master compliance and improve skilled nursing facilities through workforce development.

Interactive courses engage staff in learning new skills to enhance job knowledge, boost confidence, and reduce turnover.

- **Corporate Compliance Training**

Meet federal and state training requirements, and easily create training plans with crosswalk tools to help you map your regulations to Relias content.

- **Policies and Procedures Management**

Support compliance by uploading, distributing, revising, and reporting on corporate policies and procedures within your LMS.

- **Relias Pro on the Go**

Enable staff to review techniques, steps, or procedures at the point of care in 10 minutes or less with modules (mostly video) that focus only on the essentials.

- **Competency and Requirements Tracking**

Keep up with your team's competency, professional licensing, and certification requirements, and report on the status.

- **Relias BrainSparks®**

Deliver course follow-up questions using a spacing method rooted in brain science to boost long-term memory of key skills learned in courses.

- **Custom Content**

Ability to customize by uploading organization-specific content and by tracking your own live training.

- **Scenario-Based Learning**

Allow staff to safely make, learn from, and correct decisions in a learning environment designed to actively involve them in experiences relevant to their role, so they master the skills needed to care for clients.

- **Gaming Elements**

Make learning fun with competitive activities and reward-based targets.

Discover how other skilled nursing facilities are using Relias to impact the lives of those they serve.
